Gentlemen:

In your letter of March 23, 1983 from Mr. J. Farrell Petersen you stated that the above wells were spudded, however, since the time they were spudded the lake level had risen to such an extent that you were going to have to change your complete plan of attack.

In checking our records, we have not received any monthly drilling reports or spudding information on these wells. Rule C-22, General Rules and Regulations and Rules of Practice and Procedure, requires that said reports be filed on or before the sixteenth (16) day of the succeeding month. This report may be filed on Form OGC-1B, (U. S. Geological Survey Form 9-331) "Sundry Notices and Reports on Wells", or on company forms containing substantially the same information. We are enclosing forms for your convenience.

We have also received a Notice of Cancellation of your bond #56 0130 12677 82 6 on Well #1 effective October 15, 1983. As long as a well is not plugged and abandoned in accordance with proper procedures, it is mandatory that there be a viable bond. If you wish to continue developing business in the State of Utah, compliance with pertinent rules and regulations is essential.

Thank you for your prompt attention to this matter.

Gentlemen:

In reference to the above mentioned wells, considerable time has gone by since approval was obtained from this office.

This office has not received any notification of spudding. If you do not intend to drill these wells, please notify this Division. If spudding or any other activity has taken place, please send necessary forms. If you plan to drill these locations at a later date, please notify as such.

We will be happy to acknowledge receipt of your response to this notice if you will include an extra copy of the transmittal letter with a place for our signature, and a self addressed envelope for the return. Such acknowledgement should avoid unnecessary mailing of a firm second notice from our agency.

Your prompt attention to the above will be greatly appreciated.

Dear Cari:

On June 21, 1982, Mr. Farrell Petersen notified by telephone our intentions to spud both wells number C.D.I. #1 and C.D.I. #2. C.D.I. #1 was TD at 267 feet with no apparent significant hydrocarbon encounter. Thirty feet of conductor casing was set in C.D.I. #2. Since that time the lake level has risen to such an extent we are going to have to change our complete plan of attack. Hopefully some time during the summer of 1983 both of these wells and others can be completed. We do intend on continuing with the project. We will keep you informed of our intentions.

Very truly yours:
